GENERAL INFORMATION - WAIVERS, REFUNDS AND EXEMPTIONS

Waivers or fee reductions are typically based on housing affordability, duplication of fees, or any other issue related to fairness or equity. **Refunds** are justified when there is an adjustment in overall square footage, the project was not constructed, or a determination is subsequently made that the fees were improper. **Exemptions** are only recognized for: Residential additions under 500 sq. ft.; Senior Housing; reconstruction of a structure destroyed by natural disaster; facilities used exclusively for religious purposes; facilities used exclusively as a private full-time day school; any governmental facilities—local, state or federal; state-owned housing for migrant farm workers; replacement of a mobile home in currently occupied mobile home space

RESIDENTIAL CONSTRUCTION – DEFINITIONS

Residential Construction includes: the development of single-family detached housing units, single-family attached housing units, manufactured homes and mobile homes, condominiums, and multifamily housing units, including apartments, residential hotels, and stock cooperatives. **Cal. Govt. Code 65995.5 (g)**.

Assessable Space includes: all of the square footage within the perimeter of a residential structure, not including any carport, covered or uncovered walkway, garage, overhang, patio, enclosed patio, detached accessory structure, or similar area. **Govt. Code Section 65995, subdivision (b)(1)**.

COMMERCIAL / INDUSTRIAL - LAND USE CATEGORIES

Retail and Services. The retail and services category includes commercial establishments which sell general merchandise, building materials, hard goods, apparel, and other items and services to consumers. Additional establishments in the retail and services category include nurseries, discount stores, restaurants, entertainment theme parks, new/used car sales facilities, service stations, supermarkets, banks, real estate sales offices, and similar uses.

Office. A general office building houses one (1) or more tenants and is the location where affairs of a business, commercial or industrial organization, professional person or firm are conducted. The building or buildings may be limited to one (1) tenant, either the owner or lessee, or contain a mixture of tenants including professional services, insurance companies, investment brokers, company headquarters, and services for the tenants such as a bank or savings and loan, a restaurant or cafeteria, and service retail and services facilities. There may be large amounts of space used for file storage or data processing. The office category may also include medical offices that provide diagnoses and outpatient care on a routine basis, but which are unable to provide prolonged in-house medical/surgical care. A medical office is generally operated by either a single private physician or a group of doctors.

Research and Development. Research and development facilities are those primarily associated with the application of scientific research to the development of high technology products. Areas of concentration include materials, science, computer, electronic, and telecommunications products. Facilities may also contain offices and fabrication areas. Activities performed range from pure research to product development, testing, assembly, and distribution.

Industrial/Warehouse/Manufacturing. Warehouses are facilities that are primarily devoted to the storage of materials. They may also include office and maintenance areas. This category also includes buildings in which a storage unit or vault is rented for the storage of goods. Manufacturing facilities are building structures where the primary activity is the conversion of raw materials or parts into finished products. Size and type of activity may vary substantially from one facility to another. In addition to actual production of goods, manufacturing facilities generally have office, warehouse, research and associated functions. This category includes light industrial facilities such as printing plants, material testing laboratories, assemblers of data processing equipment, and power stations.

Hospital. Hospital refers to any institution where medical or surgical care is given to non-ambulatory and ambulatory patients. The term does not however, refer to medical clinics (facilities that provide diagnoses and outpatient care only) or to nursing homes (facilities devoted to the care of persons unable to care for themselves).

Hotel/Motel. Hotels and motels are commercial establishments primarily engaged in providing lodging, or lodging and meals, for the general public. As defined by Government Code Section 65995(d), the hotel/motel category includes, but is not limited to, any hotel, motel, inn, tourist home, or other lodging for which the maximum term of occupancy does not exceed 30 days. It does not, however, include any residential hotel as defined by Section 50519(b)(1) of the Health and Safety Code.

Self-Storage. This category includes buildings in which a storage unit or vault is rented for the storage of goods and/or personal materials. This category may also include office areas associated with storage.

Note that CID land use categories may include different industry types. For example, firms in the transportation, communications, or utilities industries may be classified in up to six (6) of the seven (7) land use categories shown above. Similarly, retail firms may also occupy office or industrial space (e.g., for corporate headquarters or warehousing) and manufacturing firms may occupy retail space (e.g., factory retail outlets). In evaluating any given project, the District should assign the project to whichever CID category is the predominant use within the project.
