Are You Prepared for the Storms?

As a resident of San Francisco, you should be taking the necessary steps now to prepare yourself, your family, and your property for the next storm. Take time out today and get ready for heavy storms and possible flooding.

Tips for Getting Ready this Stormy Season

Property Owners

- Check your roof for leaks or missing/damaged tiles and shingles.
- Clear gutters, downspouts and drains of debris and clogs.
- Secure or remove patio furniture, i.e. umbrellas, chairs, tables, tarps and awnings to reduce wind-blown damage.
- Inspect and repair exterior appendages (deck, balcony, stair) on your property.
- Prepare your emergency kit, have adequate supplies, and review your emergency plan with family members.

Contractors

- Be aware of weather conditions and prepare job sites for storms as soon as possible.
- Fill and/or cover up trenches and building openings to prevent water collection.
- Remove tools, debris or any items from construction sites that can be blown away.
- Protect ceiling and roof work that is in progress.
- Secure scaffolding in anticipation of strong winds.
